STRING REPLACEMENT CHALLENGE

GOAL

Using the given text file (Primary.txt), replace all the instances of a given word or phrase in the file based upon input in a console (old text, new text).

BONUS

Using the given text file (Bonus.txt), find all the parameters (using code) that are inside curly braces. Ask the user for replacement values. Only ask once per parameter name. So when you find {FirstName}, ask for the FirstName value and replace it.
